ShopEasy – Online Shopping Website

1. Introduction

ShopEasy is a simple and attractive online shopping website developed using HTML and CSS. It allows users to explore different product categories, view products, check prices, and learn about special discounts. The website provides a user-friendly design with a beautiful layout and easy navigation.

2. Problem Statement

Nowadays, people prefer online shopping because it saves time and makes it easier to explore different products. However, customers need a simple platform where they can view product details, compare prices, and find special offers in one place.

The main aim of this project is to develop a simple and user-friendly online shopping website that displays different products, categories, prices, discounts, and contact information.

3. Objectives

- To develop a simple and attractive online shopping website.
- To display different product categories.
- To provide product details and images.
- To display product prices and discounts.
- To make product browsing easy through navigation links.
- To provide subscription and contact sections.
- To create a user-friendly and responsive website design.

4. Key Features

1. **Home Page:** Displays the ShopEasy website name and welcome message.
2. **Navigation Bar:** Provides links to Home, Categories, Products, Offers, and Contact sections.
3. **Product Categories:** Displays Electronics, Fashion, Footwear, and Accessories.
4. **Product Display:** Shows product images, names, and descriptions.
5. **Price Details:** Displays original prices and discounted prices.
6. **Special Offers:** Highlights discounts up to 50% on selected products.
7. **Why Choose ShopEasy:** Explains the benefits of shopping through the website.
8. **Subscription Form:** Allows users to enter their name, email address, and favourite category.
9. **Contact Section:** Displays customer support details.
10. **Footer:** Displays copyright information and a Back to Top link.

5. Applications

- Online shopping product display.
- Product and price comparison.
- Promotion of products and special offers.
- Displaying different shopping categories.
- Learning about online shopping website layouts.
- Practising HTML forms and CSS styling.
- Creating a basic design for an e-commerce website.

6. Technologies Used

HTML5:

- Used to create the structure of the website.
- Used to add headings, paragraphs, images, links, lists, and forms.
- Used to organize different sections of the webpage.

CSS3:

- Used to add colours, backgrounds, borders, and fonts.
- Used to style product cards and buttons.
- Used to improve the appearance and layout of the website.
- Used to make the design suitable for smaller screens through media queries.

7. Conclusion

ShopEasy is a simple and attractive online shopping website developed using HTML and CSS. It provides different product categories, product details, prices, discounts, subscription forms, and contact information in an organized manner.

This project helps us understand the basics of web development, HTML elements, CSS properties, webpage structure, and website designing. It provides a foundation for developing more advanced e-commerce websites in the future.
