WEB DEVELOPMENT ACTIVITY BASED LEARNING

Gaming and Esports Community Website 🎮

1. Problem Statement

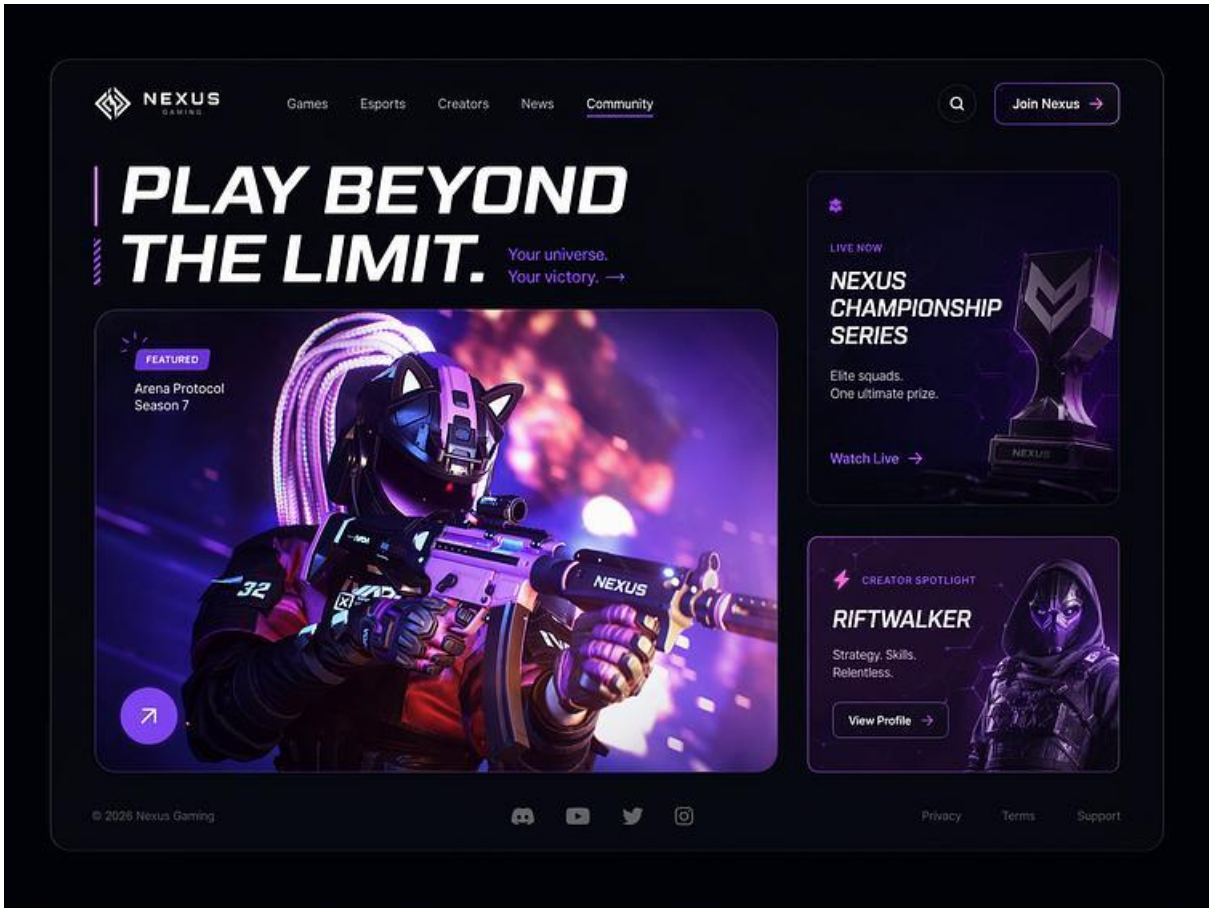

Nowadays, gaming and esports are becoming popular among students and young people. However, gamers often find it difficult to get all gaming-related information, such as game details, tournament schedules, team information, player profiles, leaderboards, and gaming news, in one place.

The Gaming and Esports Community Website aims to solve this problem by providing a single, attractive, and user-friendly platform where gamers can explore games, follow tournaments, view team rankings, learn about players, and stay updated with the latest gaming activities.

2. Objectives

1. To develop an attractive and user-friendly gaming website using HTML and CSS.
2. To provide information about popular games and esports tournaments.
3. To display player profiles, team details, and gaming rankings.
4. To show tournament schedules and match information.
5. To display leaderboards based on player rankings and scores.
6. To provide the latest gaming news and updates.
7. To encourage interaction and participation within the gaming community.

3. Key Features

1. Game Profiles

Display popular games with images, descriptions, categories, and difficulty levels.

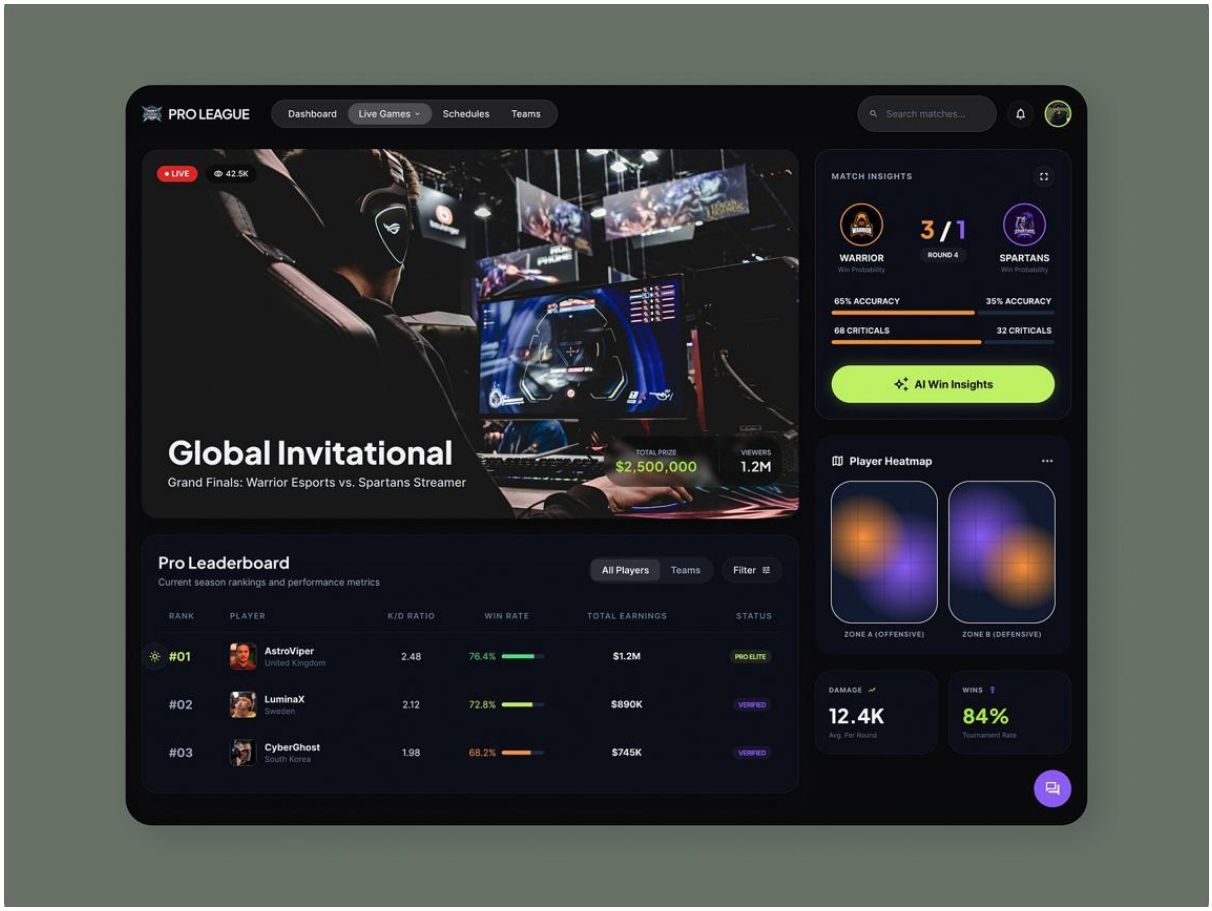

2. Tournament Schedules

Show tournament names, match dates, timings, participating teams, and results.

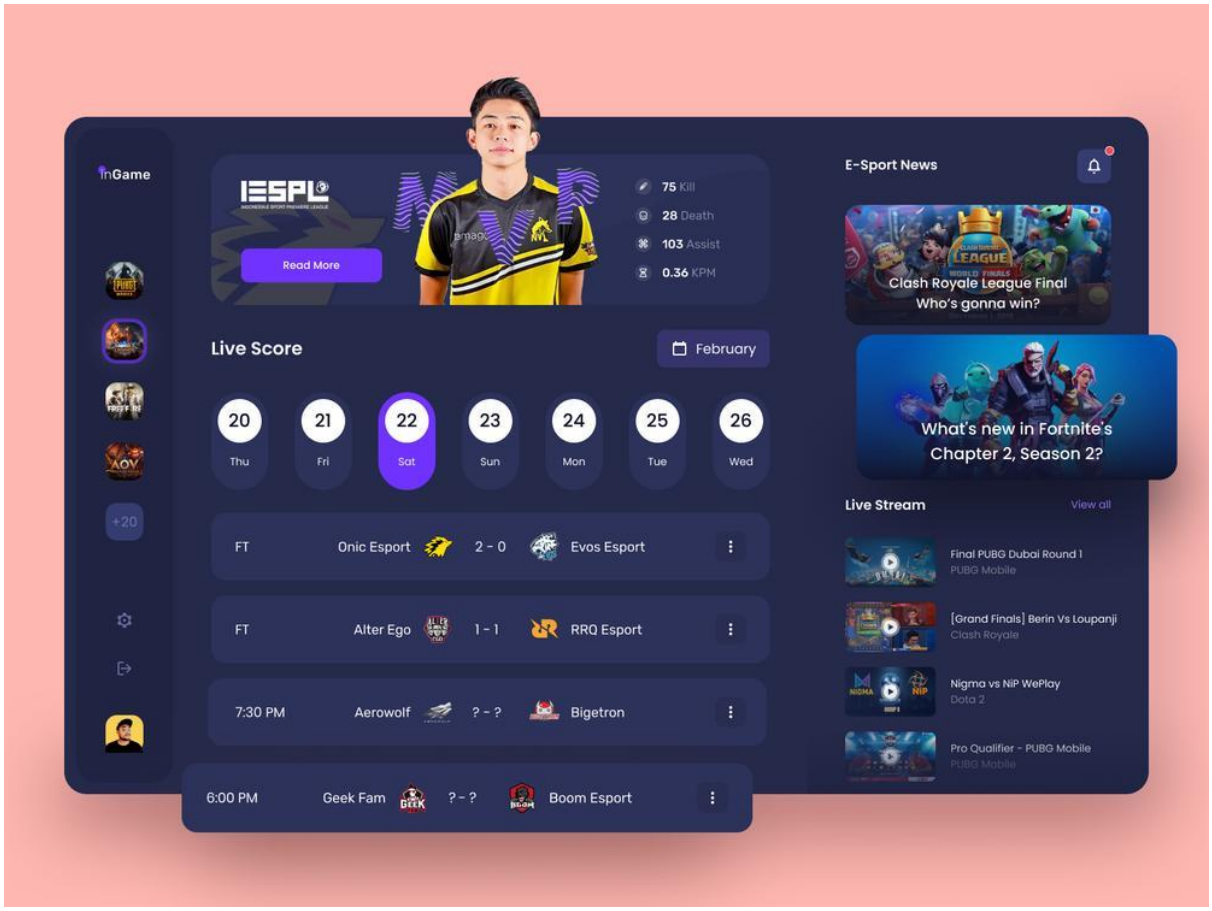

3. Team and Player Profiles

Display team names, player nicknames, roles, achievements, and individual statistics.

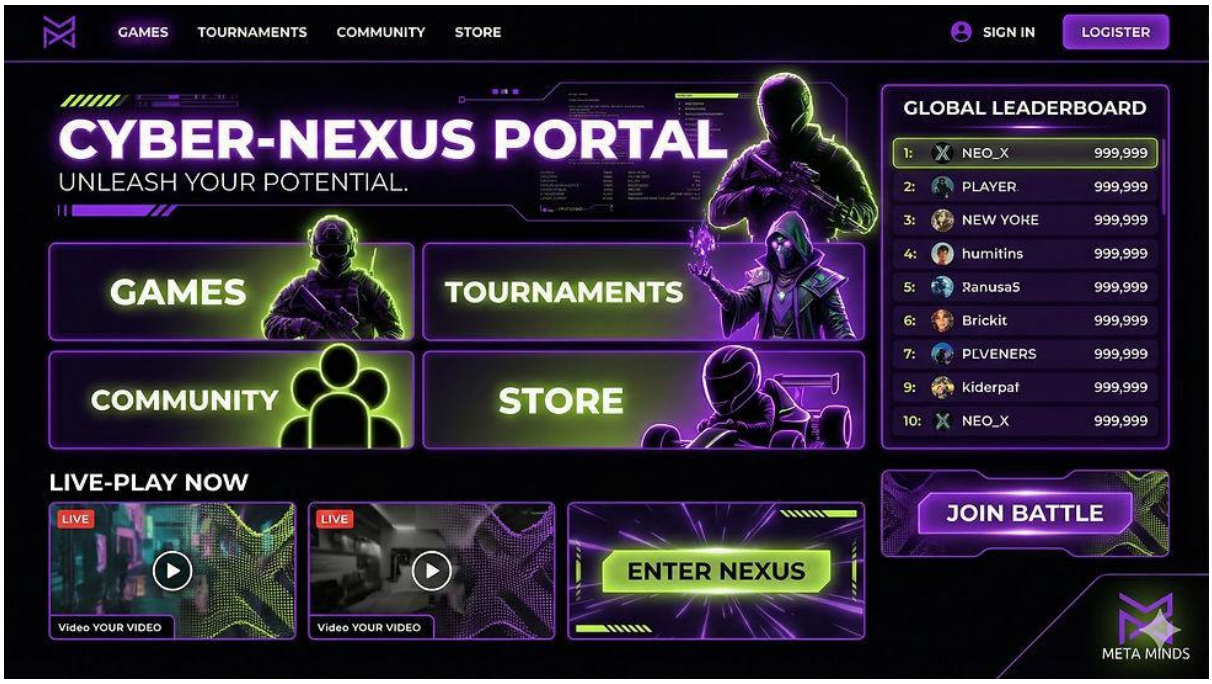

4. Leaderboards

Rank players and teams based on points, victories, performance, and achievements.

5. Gaming News and Updates

Provide updates about new games, tournaments, gaming events, and esports competitions.

6. Attractive User Interface

Use dark backgrounds, neon colors, bold typography, navigation menus, buttons, hover effects, and responsive layouts.

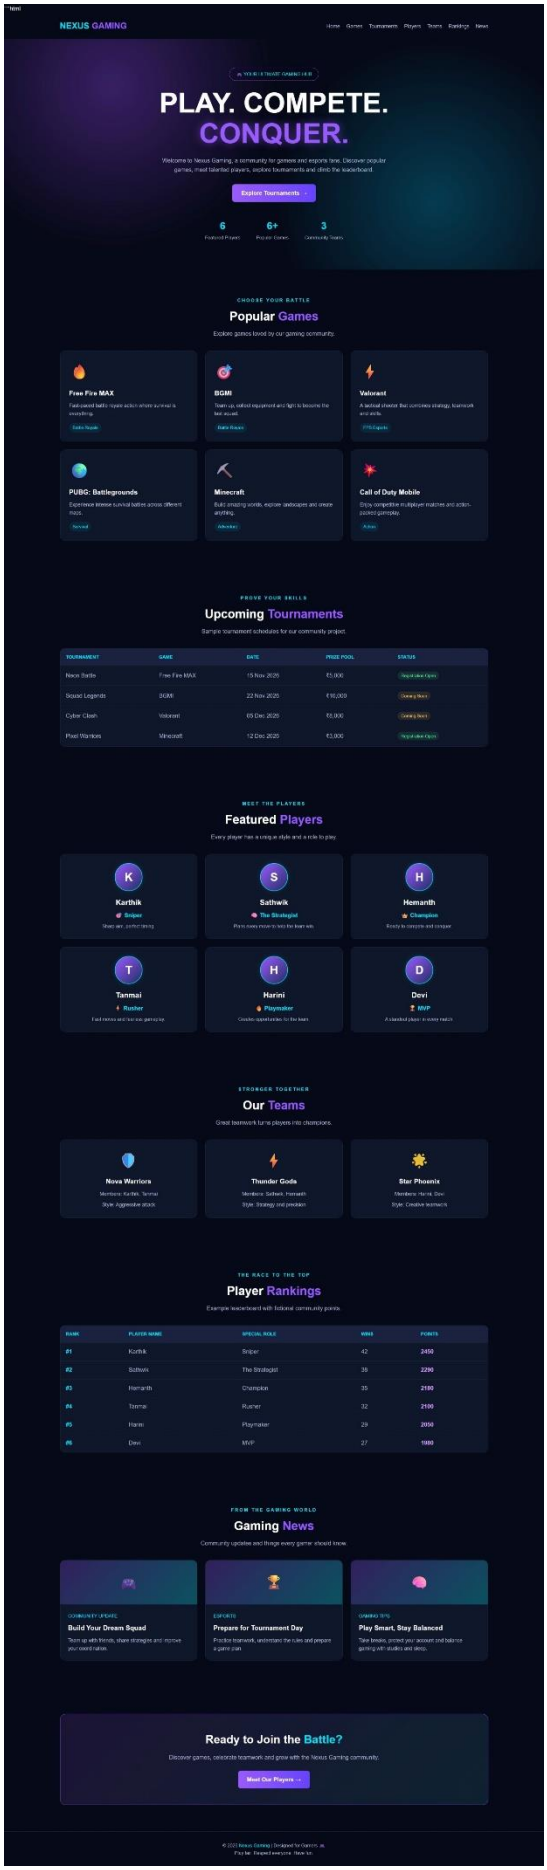

4. Applications

1. Gaming Communities: Helps gamers discover games, teams, and other gaming enthusiasts.
2. Esports Organizations: Provides a platform to publish tournament schedules and team information.
3. Colleges and Universities: Supports college gaming clubs and esports competitions.
4. Tournament Organizers: Helps communicate match schedules, scores, and rankings.
5. Game Developers: Offers a platform to showcase games and share updates.
6. Gaming Enthusiasts: Allows users to follow player achievements, leaderboards, and gaming news.

5. Technologies Used

- HTML: Creates the structure of the website.
- CSS: Adds colors, layouts, animations, hover effects, and responsive designs.
- JavaScript (optional): Adds interactive features such as live search, dynamic leaderboards, and registration form validation.

Expected Outcome: A visually attractive, responsive Gaming and Esports Community Website that organizes gaming information in one place and provides an engaging experience for gamers, students, and esports fans.
