# NEXUS GAMING

## 1. Problem Statement

In today's digital world, many people are interested in online gaming and esports. However, gamers often find it difficult to access information about popular games, upcoming tournaments, players, teams, rankings, and gaming updates in one place.

The Nexus Gaming Website is developed to provide a common platform where gamers can explore games, view tournament schedules, know about players and teams, check player rankings, and stay updated with gaming news.

## 2. Objectives

1. To develop a user-friendly gaming and esports website.
2. To provide information about popular online games.
3. To display upcoming gaming tournaments and their schedules.
4. To introduce featured players and gaming teams.
5. To display player rankings through a leaderboard.
6. To provide the latest gaming news and updates.
7. To create an attractive and responsive website.
8. To encourage teamwork and community participation among gamers.

## 3. Key Features

1. Home Page: Displays the introduction of Nexus Gaming with a welcome message and gaming statistics.
2. Popular Games: Shows popular games such as BGMI, Free Fire MAX, Valorant, Minecraft, PUBG, and Call of Duty Mobile.
3. Tournament Section: Displays tournament names, game details, dates, prize pools, and registration status.
4. Featured Players: Introduces players with their names, roles, and descriptions.
5. Teams Section: Displays gaming teams, their members, and playing styles.

6. Player Rankings: Shows player positions, wins, roles, and points in a leaderboard.

7. Gaming News: Provides gaming tips, community updates, and esports information.

8. Navigation Menu: Helps users easily move between different sections.

9. Responsive Design: Adjusts the website layout for desktops, tablets, and mobile screens.

10. Attractive UI: Uses neon colors, gradients, hover effects, and modern card designs.

## 4. Applications

1. Gaming Communities: Helps gamers connect and explore gaming-related information.

2. Esports Organizations: Can be used to display tournaments and competitive gaming events.

3. College Gaming Clubs: Useful for organizing college-level gaming competitions.

4. Tournament Management: Can serve as an information platform for tournament schedules and results.

5. Player Promotion: Helps showcase talented gamers and their achievements.

6. Gaming News Platforms: Can share gaming updates, tips, and announcements.

7. Team Formation: Helps players discover teams and understand team structures.

## 5. Technologies Used

- HTML5: Used to create the structure of the website.

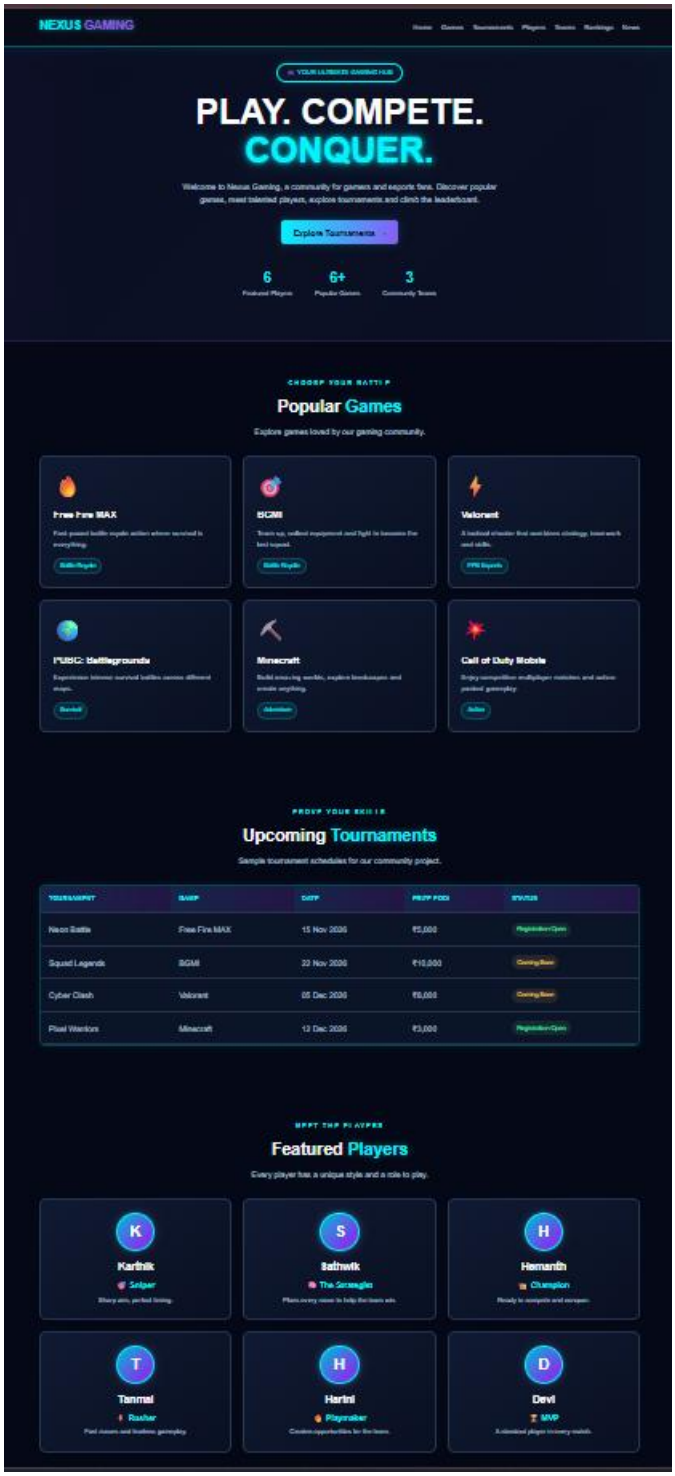

- CSS3: Used for styling, colors, layouts, animations, and responsive design.

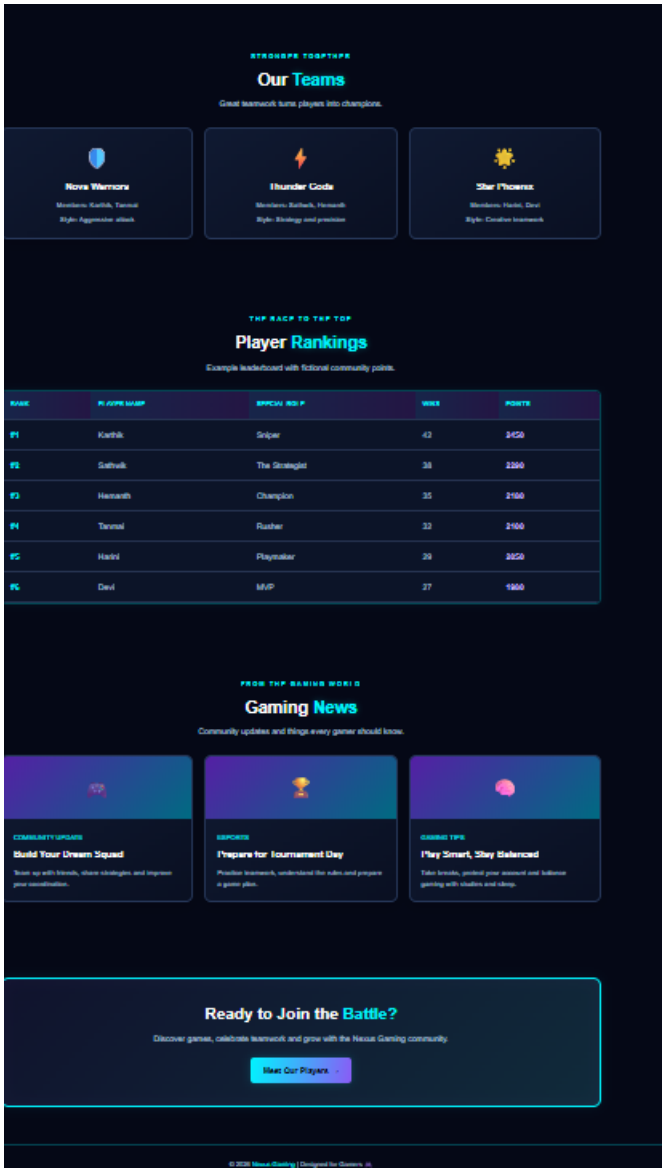

## 6. Conclusion

The Nexus Gaming website provides an attractive and user-friendly platform for gamers and esports enthusiasts. It brings popular games, tournaments, players, teams, rankings, and gaming news together in one place. This project demonstrates the use of HTML and CSS to develop a modern, responsive gaming website.
